

gummitex[®] rubber strap

Do you want to secure your goods in a roll container? Then our gummitex[®] rubber straps are exactly the right choice for you. Our gummitex[®] rubber straps have been specially developed for use on the roll container and represent a new development. The mixed fabric made of firm textile and flexible elastic components ensures the best possible work safety. Particularly noteworthy is the UV resistance, which prevents embrittlement. Gummitex[®] rubber straps are the new standard in terms of load securing for roll containers and are available in different designs.

gummitex[®] Advantages in comparison

Old version Standard rubber strap

- fluctuating elasticity and resilience
- Material weakening by UV and other environmental influences
- Security risk from sudden material failure

NEW gummitex[®] rubber strap

- flexible and easy to use
- constant elasticity and resilience
- high occupational safety due to UV-resistance and durable blended fabric

consistent quality

UV-resistant

Comfortable and easy to use
